OEFENINGEN JAVA

Spring: Validation

Oefening 1: Spring Web MVC: Validation

The screenshot shows a web browser window with the address bar displaying 'localhost:8080/spring_validation/numbers.htm'. The page contains a form with three input fields and a submit button. The first field is labeled 'Amount:' and contains the value '2000,86'. The second field is labeled 'Number1:' and contains the value '2.000'. The third field is labeled 'Number2:' and contains the value '1.234.566'. A 'Submit' button is located below the input fields.

Gebruik annotations:

Amount:

- maximum is 5000.50 (grens inbegrepen)
- wordt steeds met twee cijfers na de komma afgebeeld
- initiële waarde = 2000.856

Number1:

- moet liggen tussen 1 en 11000 (grenzen inbegrepen)
- initiële waarde = 2000 (wordt afgebeeld als 2.000)

Number2:

- moet ingevuld zijn
- initiële waarde = 1234566 (wordt afgebeeld als 1.234.566)

Maak een validator-klasse:

Number1 moet kleiner zijn dan Number2

Schrijf een eigen annotation 'Even'

Number 2 moet even zijn

← → ↻ 📄 localhost:8080/spring_validation/numbers.htm

Amount: must be less than or equal to 5000.50

Number1: number1 < number2

Number2:

← → ↻ 📄 localhost:8080/spring_validation/numbers.htm

Amount:

Number1: must be less than or equal to 11000

Number2:

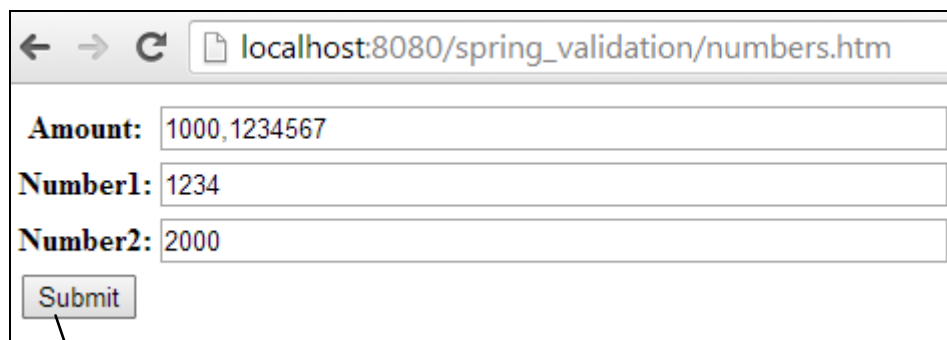

← → ↻ 🏠 📄 localhost:8080/spring_validation/numbers.htm ☆ ☰

Amount:

Number1:

Number2: must have even number

numberForm.jsp:

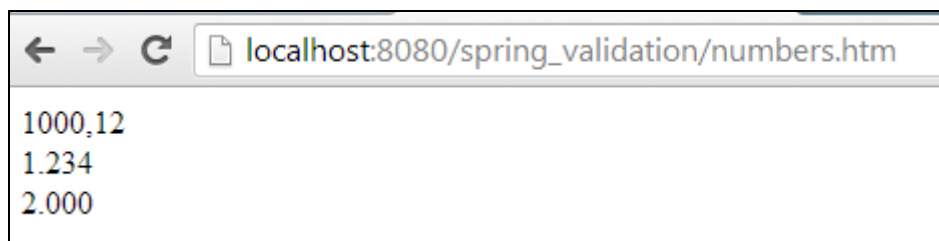

← → ↻ localhost:8080/spring_validation/numbers.htm

Amount:

Number1:

Number2:

numberSuccess.jsp:
